**International Code Council : 2006 IPC Fundamentals - Based on the 2006 International Plumbing Code** before purchasing it in order to gage whether or not it would be worth my time, and all praised 2006 IPC Fundamentals - Based on the 2006 International Plumbing Code:

2006 IPC FUNDAMENTALS The provisions of the International Plumbing Code (IPC) are divided into four major parts: Administration, Definitions, and General Regulations; Fixtures, Water Heaters, Interceptors and Separators; Water Supply Systems, Sanitary Drainage and Vents; and Storm Drainage, Special Piping and Storage Systems. The 2006 IPC Fundamentals will provide code officials with the fundamental knowledge necessary to administer and enforce application code requirements of the 2006 IPC. This text will better enable you to: \* Identify code enforcement issues and key code sections in each chapter of the 2006 IPC. \* Describe the application of the code to inspection, plan review and code enforcement.
