**Stephen Crafti : Affordable Architecture: Great Houses on a Budget** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Affordable Architecture: Great Houses on a Budget:

28 of 28 people found the following review helpful. No discount housing here, but great references. By Dr. James Berryhill A very attractive book and a good concept but the "budget" that the authors are talking about is far and away out of the range I was looking for. The references are worth the price of the book. 58 of 65 people found the following review helpful. "Affordable" By Kramer What I consider affordable and what the author considers affordable is like comparing an apple to an orange. If you have any clue what materials cost to build a home you will quickly realize you may also differ from the author. I will say I do like this book, but I do think affordable and budget is a slight play on words. 14 of 19 people found the following review helpful. Affordable Architecture By Samuel Merrick Good reference book however great for idea for new construction or remodeling projects in small-medium homes. Suggest you read full review before purchase though.

o Showcasing houses that are driven by a budget, this book features 50 projects from Australia, New Zealand, the USA and Europe. Includes new homes, kit homes and renovations. This new book by Stephen Crafti showcases innovative budget-driven architecture from around the world. These new houses, extensive renovations, and kit homes illustrate how dreams can be achieved with restricted funds. Rather than attempting to fulfil endless wish lists, the architects and designers of these budget-conscious projects first assessed what was needed. Including more than 40 projects from Europe, the United States, Japan, and Australia, this book highlights the fact that strong ideas are often

more valuable than unlimited budgets. And in lean times, more people are looking for imaginative solutions that won't cost the earth. The homes in this book demonstrate that creating something extraordinary on a budget requires innovation and imagination as well as recognition of the importance of sustainable living.
