Le Corbusier : Le Corbusier: A Study of the Decorative Art Movement in Germany before purchasing it in order to gage whether or not it would be worth my time, and all praised Le Corbusier: A Study of the Decorative Art Movement in Germany:

First published in 1912, tude sur le mouvement d'art dcoratif en Allemagne was Le Corbusier's first publication. In it, the young architect lucidly analyzed the German applied arts movement and its protagonists (such as Peter Behrens, for whom Le Corbusier worked in 1910-11). The text is one of the most substantial documentations of the development of modern German design; at the same time, it provides essential insights into Le Corbusier's early career. This publication introduces the tude in its first-ever English translation. An extensive illustrated commentary discusses Le Corbusier's text in the context of applied arts, politics and architecture, on the eve of the First World War.
